REFERENCE LETTER

As part of the cooperation with Stratego24 Przemysław Jóskowiak, owner of the brand EECOM - European Institute for E-commerce, the optimization of jar-met.pl, a website built on the WordPress content management system, was performed. The work concerned in particular:

- modernization of the website design,
- adding a product configurator functionality,
- launching an online store,
- adding the functionality of an interactive map.

The work was done professionally, reliably and according to our expectations. We recommend Stratego24 Przemysław Jóskowiak as an expert in WordPress technology as well as in the area of building a professional web presence for business and marketing purposes.

JAR-MET
